[Best Practices iMIS Data Insert Form.json](#)

iMIS Setup

Table Name

- Zentso_BestPractices_Pets

Columns

- PetAge
- PetName
- PetSpecies
- UserID

Zentso_BestPractices_Pets

Property Name	Property Type	Length	Log All Changes
Ordinal	Integer		No
PetAge	Decimal		No
PetName	String	80	No
PetSpecies	String	80	No
UserID	Integer		No

IQA To Import

[Best Practices IQAS.xml](#)

iMIS Page Setup

The First Content Panel will be **Best Practices: iMIS Data Insert**.

The second content panel will be the **Best Practices: Tabulator**

NOTE: It is not recommended that you put two workflows on the same page when in production and should be avoided at all costs. However since the forms have been split up as they do two different functions and for ease of digesting one concept at a time, we have chosen to put them on one page. Ideally you would merge the two forms together into one.
